PROFESSIONAL SUMMARY

Associate Software Engineer and Full-Stack Developer with 1 year of industry experience building production-grade applications using the MERN Stack, Next.js, PostgreSQL, and Supabase. Skilled in secure REST and FastAPI services, JWT authentication, and containerized deployments with Docker and Kubernetes, along with automation testing (Cypress, Playwright, Selenium), cloud architecture, and system design. Additionally proficient in Computer Vision, RAG Pipelines, and LLM-integrated platforms, delivering scalable, end-to-end solutions in Agile environments.

EDUCATION

FAST National University of Computer and Emerging Sciences, Pakistan

Aug. 2022 – June 2026

Bachelor of Science in Computer Science

Relevant Coursework: Object-Oriented Programming, Data Structures & Algorithms, Database Systems, Web Programming, Software Engineering, Deep Learning, Artificial Intelligence, Computer Vision, Generative AI & Software Testing

EXPERIENCE

Full Stack Developer – Digital Genei (Hybrid)

Jun. 2025 – Jun. 2026

- Delivered scalable full-stack features across 3+ production modules using React.js, Next.js, Node.js, PostgreSQL, and MongoDB in an Agile/Scrum environment, contributing to on-time release cycles
- Designed and implemented 15+ secure REST and FastAPI endpoints with JWT-based authentication and role-based access control (RBAC), reducing backend integration issues by 35% across client-facing applications
- Optimized database schemas and refactored slow-running queries in PostgreSQL and MongoDB, improving average query response time by 25% across high-traffic modules
- Containerized and deployed FastAPI services with Docker and Kubernetes, and built responsive, performance-optimized UIs using TailwindCSS and Vite for a consistent cross-device experience

Backend Developer Intern – Digital Genei (On-site)

Jun. 2024 – Aug. 2024

- Developed RESTful APIs using Node.js and MongoDB, enabling seamless frontend-backend integration for production features
- Improved database schema design and optimized slow queries, reducing average query execution time by 20%

PROJECTS

ProcureSenseAI – Smart Procurement System (FYP) | *React, Node.js, PostgreSQL, REST API, FastAPI, PyTorch, NLP, JWT*

- Engineered a multi-tenant SaaS procurement platform with RFQ management, vendor lifecycle tracking, and role-based access control (RBAC), reducing manual procurement steps by 50% through automated workflow execution
- Integrated AI-driven spend analysis and risk evaluation with a real-time analytics dashboard, backed by a Dockerized FastAPI microservice and PyTorch-powered forecasting models

ShopEx – Full-Stack E-Commerce & User Management Platform | *Next.js, Express.js, TypeScript, Supabase, Django, Tailwind CSS*

- Engineered a full-stack e-commerce platform with multi-role authentication, Google OAuth, JWT sessions, email verification, and a role-based admin dashboard supporting complete product and user management
- Implemented advanced search with multi-attribute filtering, image uploads, and a fully responsive glassmorphism UI with Sequelize ORM-backed relational schema design

CareerCraft – AI-Powered Career Development Platform | *MERN Stack, OpenAI, Tailwind CSS, Kubernetes, NLP, Docker*

- Developed an AI-driven career platform featuring Resume Builder with ATS scoring, Interview Simulator, Skill Gap Analysis, and Career Roadmap Generator with real-time personalized recommendations
- Engineered a scalable full-stack architecture with AI-powered APIs, Dockerized services, Kubernetes orchestration, and interactive analytics dashboards to deliver a seamless user experience

Object Detection System – South Asian Urban Traffic | *YOLOv8m, Python, PyTorch, OpenCV, Roboflow, NumPy, CLIP*

- Built and curated a custom annotated dataset of 7 South Asian traffic classes (car, bike, bus, truck, rickshaw, van, person) covering 1,000+ images across crowded intersections, occlusions, and mixed lighting conditions using Roboflow
- Fine-tuned YOLOv8m on PyTorch with a structured training and evaluation pipeline, achieving 80% mAP@0.5 with an inference system supporting both image and real-time video input

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, SQL, Oracle, C++, HTML/CSS

Frontend Management: React.js, Next.js, Tailwind CSS, Vite

Backend Management: Node.js, Express.js, FastAPI, Django, REST API, JWT Authentication, RBAC, Solution Designing, Microservices

Database Management: PostgreSQL, MongoDB, Supabase, Prisma, MySQL, Oracle DB

AI/ML: Computer Vision, Generative AI, RAG, Transformer Models, PyTorch, TensorFlow, LLMs, Hugging Face, Streamlit

Tools & DevOps: Docker, Kubernetes, Git, GitHub, Postman, VS Code, CI/CD

Soft Skills: Team Collaboration, Problem Solving, Time Management, System Design

CERTIFICATIONS

Coursera – Machine Learning Specialization: Supervised Learning, Unsupervised Learning, Advanced Learning Algorithms

Web Development Teaching Assistant – FAST NUCES
