PROFESSIONAL SUMMARY

Software Engineer and Full-Stack Developer with 1+ year of industry experience building end-to-end product features with JavaScript, TypeScript, React, Node.js, Next.js, Nest.js, PostgreSQL, MongoDB, and Supabase. Skilled in secure REST API design, JWT authentication, and containerized deployments with Docker and Kubernetes, along with automated testing (Selenium, Mocha/Chai, Playwright, Cypress), CI/CD workflows, cloud architecture, and system design. Experienced in translating UI/UX designs into pixel-perfect, accessible, responsive components, owning deployed code in production, and using AI-assisted development tools like Copilot, Cursor and Claude Code to accelerate delivery while critically validating generated code for correctness, performance, and security. Additionally proficient in Computer Vision, RAG Pipelines, and LLM-integrated platforms, delivering scalable solutions in Agile environments.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, SQL, C++, HTML/CSS

Frontend Management: React.js, Next.js, Tailwind CSS, Vite, Responsive & Accessible UI, Pixel-Perfect Design Implementation

Backend Management: Node.js, Express.js, Nest.js, FastAPI, REST API Design, JWT Auth, RBAC, Data Modeling, Microservices

Database Management: PostgreSQL, MongoDB, Supabase, Prisma, MySQL, Oracle DB

Testing: Vitest, Jest, Mocha/Chai, Playwright, Cypress, Selenium, Unit/Integration/E2E Testing, Postman

AI & Tooling: GitHub Copilot, Cursor, Claude Code, Generative AI, RAG, LLMs, PyTorch, TensorFlow, Hugging Face, Computer Vision

Cloud & DevOps: Docker, Kubernetes, Git, GitHub, CI/CD, AWS Structure, Production Monitoring, VS Code

Soft Skills: Code Reviews, Technical Communication, Team Collaboration, Problem Solving, System Design

EXPERIENCE

Full Stack Developer – Digital Genei (Hybrid)

Jun. 2025 – Jun. 2026

- Built end-to-end product features across 3+ production modules using TypeScript, React.js, Next.js, Node.js, PostgreSQL, and MongoDB in an Agile/Scrum environment, participating in code reviews and technical discussions that shaped architecture decisions and engineering practices
- Designed, implemented, and consumed 15+ secure REST and FastAPI endpoints with JWT-based authentication and role-based access control (RBAC), ensuring data integrity and security across the stack and reducing backend integration issues by 35%
- Wrote and maintained unit, integration, and end-to-end tests with Vitest, Jest, and Playwright, and supported CI/CD workflows with automated testing and deployment to keep releases reliable and repeatable
- Owned deployed code by monitoring production behaviour, investigating performance, reliability, and UX issues, and driving remediation, while optimizing PostgreSQL and MongoDB queries to improve response time by 25%
- Translated UI/UX designs into pixel-perfect, accessible, responsive components with TailwindCSS and Vite, and containerized and deployed services with Docker and Kubernetes for consistent cross-device delivery

Backend Developer Intern – SYSTEMSITY (On-site)

Jun. 2024 – Aug. 2024

- Developed RESTful APIs using Node.js and MongoDB, enabling seamless frontend-backend integration for production features
- Improved database schema design and optimized slow queries, reducing average query execution time by 20%

PROJECTS

ProcureSenseAI – Smart Procurement System (FYP) | *React, Node.js, PostgreSQL, REST API, FastAPI, PyTorch, NLP, JWT*

- Engineered a multi-tenant SaaS procurement platform with RFQ management, vendor lifecycle tracking, and role-based access control (RBAC), reducing manual procurement steps by 50% through automated workflow execution
- Integrated AI-driven spend analysis and risk evaluation with a real-time analytics dashboard, backed by a Dockerized FastAPI microservice and PyTorch-powered forecasting models

ShopEx – Full-Stack E-Commerce & User Management Platform | *Next.js, Express.js, TypeScript, Supabase, Django, Tailwind CSS*

- Engineered a full-stack e-commerce platform with multi-role authentication, Google OAuth, JWT sessions, email verification, and a role-based admin dashboard supporting complete product and user management
- Implemented advanced search with multi-attribute filtering, image uploads, and a fully responsive glassmorphism UI with Sequelize ORM-backed relational schema design

CareerCraft – AI-Powered Career Development Platform | *MERN Stack, OpenAI, Tailwind CSS, Kubernetes, NLP, Docker*

- Developed an AI-driven career platform featuring Resume Builder with ATS scoring, Interview Simulator, and Skill Gap Analysis, built on a scalable architecture with AI-powered APIs, Dockerized services, Kubernetes orchestration, and interactive analytics dashboards

Object Detection System – South Asian Urban Traffic | *YOLOv8m, Python, PyTorch, OpenCV, Roboflow, NumPy, CLIP*

- Curated a custom annotated dataset of 1,000+ images across 7 South Asian traffic classes using Roboflow, and fine-tuned YOLOv8m in PyTorch to 80% mAP@0.5 with an inference system supporting image and real-time video input

EDUCATION

FAST National University of Computer and Emerging Sciences, Pakistan

Aug. 2022 – June 2026

Bachelor of Science in Computer Science

Relevant Coursework: Object-Oriented Programming, Data Structures & Algorithms, Database Systems, Web Programming, Software Engineering, Deep Learning, Artificial Intelligence, Computer Vision, Generative AI & Software Testing

CERTIFICATIONS

Coursera – Machine Learning Specialization: Supervised Learning, Unsupervised Learning, Advanced Learning Algorithms

Web Development Teaching Assistant – FAST NUCES
